

ABHISHEK TOMAR

LinkedIn: [linkedin.com/in/abhishek-tomar-625202294](https://www.linkedin.com/in/abhishek-tomar-625202294) | Email: abhitomar1608@gmail.com | Mobile: +91-8638260599
Saharanpur, Uttar Pradesh, India

SKILLS

Languages: Python, C, JavaScript, SQL
Technologies: HTML, CSS, Bootstrap, React, Next.js, Node.js, Express.js
Data & Tools: Pandas, openpyxl, Excel, Git, GitHub
Embedded Systems: Arduino Uno, ESP8266 NodeMCU, Proteus Simulation

PROJECTS

Setu Bank — Agentic AI Banking OS *Hackathon Project*

- Built a single-file agentic AI banking demo with a five-agent architecture handling distinct banking workflows.
- Integrated the live Claude API to drive conversational, task-oriented agent behavior.
- Tech Stack:** Python, Claude API, Multi-Agent Architecture

Pawmarg Trust — NGO Donation Platform *Full-Stack Web Application*

- Developed a full-stack donation website for an animal welfare NGO with a UPI QR-code payment flow.
- Built an admin panel for logging and tracking donations.
- Tech Stack:** HTML, CSS, JavaScript, Node.js, Express.js

Hybrid Piezoelectric–Solar Energy Harvesting System *Hardware / Embedded Systems Project*

- Designed a 16-disc piezoelectric array combined with solar input, controlled via Arduino Uno, to harvest energy from footfall and sunlight.
- Validated the design through Proteus circuit simulation and a working hardware prototype; extended it with an ESP8266 NodeMCU bridge for smartphone monitoring.
- Authoring an IEEE-format manuscript on the system for journal submission.
- Tech Stack:** Arduino Uno, ESP8266 NodeMCU, Proteus, Blynk

Manufacturing Performance Dashboard *Data Analysis Project*

- Built an Excel-based performance dashboard from a 10,000+ row plant dataset.
- Applied ETL processing, SUMIFS-based filter logic, KPI cards, and dynamic charts to surface plant performance metrics.
- Tech Stack:** Python, pandas, openpyxl, Excel

Quiz Taker Website *Web Development Project*

- Built an interactive quiz-taking website.
- Tech Stack:** HTML, CSS, JavaScript

Citizen Portal *Full-Stack Web Application*

- Built a web application allowing citizens to access government services and information online.

Requirement Validation & Progress Tracker *Full-Stack Web Application*

- Built a web application for validating project requirements and tracking project progress.

CERTIFICATIONS

Artificial Intelligence Certification — Intel collaboration with Chandigarh University	Aug 2025
HTML, CSS Certification — Cisco Networking Academy	Dec 2025
Workshop of Google Kaggle — Google	Nov 2025
Data Science Certification — Infosys Springboard	Mar 2026
ECE Exhibition Workshop — Lovely Professional University	Nov 2025
Python Programming Certification — Saylor Academy	Dec 2025

ACTIVITIES

- Participated in a collegiate hackathon.
- Participated in the Tata Crucible Business Quiz.
- Completed a Leadership and Fundamentals training program.

EDUCATION

Lovely Professional University <i>Bachelor of Technology — Computer Science and Engineering (AI/ML)</i>	Phagwara, Punjab 2025 – 2029
South Point School <i>Higher Secondary Education</i>	2024 – 2025
